

Restore Trust in Outbound Calls

VeriMe delivers live, in-call proof of identity — authenticated by your identity provider — so customers know it's really you calling.

THE PROBLEM

- **Rising Fraud:** Phone scams are increasing in number and sophistication.
- **Brand Damage:** Scammers impersonate trusted organisations to con the public.
- **Dead Channel:** Customers no longer answer because phone communication is broken.

THE SOLUTION

VeriMe is a caller verification system that delivers live, in-call proof of identity to call receivers. Authenticated by your identity provider, it ensures only genuine employees can verify themselves, completely shutting out scammers.

HOW IT WORKS

1

Connect

Connect your identity provider to VeriMe once.

2

Call

Call customers or residents as normal.

3

Verify

Send live, secure proof of identity mid-call.

4

Confirm

Receivers instantly view your name, role, and company via the VeriMe app.

WHY VERIME?

Protect the Public

Receivers instantly spot scams and hang up safely.

Shield Your Brand

Stop fraud by ensuring scammers cannot fake your ID.

Boost Answer Rates

Turn the phone back into your most trusted channel.

KEY FEATURES

Enterprise Security

Connects directly to your existing Identity Provider.

Individual ID

Shows the caller's specific name and role, not just the brand.

Real-Time Proof

Sends verification during the call without requiring a hang-up.

Zero Integration

Works instantly alongside your existing phone system.

Privacy First

Temporary verification sessions are never stored long-term.

Full Audit Trail

Every single verification is logged for compliance.

Join Our Pilot

We are currently engaging with local government and housing associations. Have a say in shaping VeriMe through a free pilot and design partnership.
